Newsletter

Quarterly newsletter updates

Information Dissemination

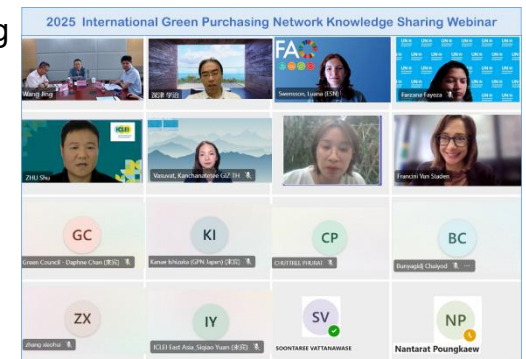

IGPN website with more than 60 News and events updates

New advisory board member on board

Ms. Kanchanatetee Vasuvat , Community Manager, GIZ Thailand Office

Webinar

Regular webinar to stimulate experiences sharing

Output and Outcome

Collaborative activity

This June, International Green Purchasing Network (IGPN), in collaboration with the One Planet Network's Sustainable Public Procurement Programme, [call for Innovative Practice Cases on Carbon Label Based Supply Chain Management](#), aimed at advancing carbon label/carbon reduction based supply chain management.

A continuous efforts with IGPN [case study on low carbon](#)

One planet
procure with care

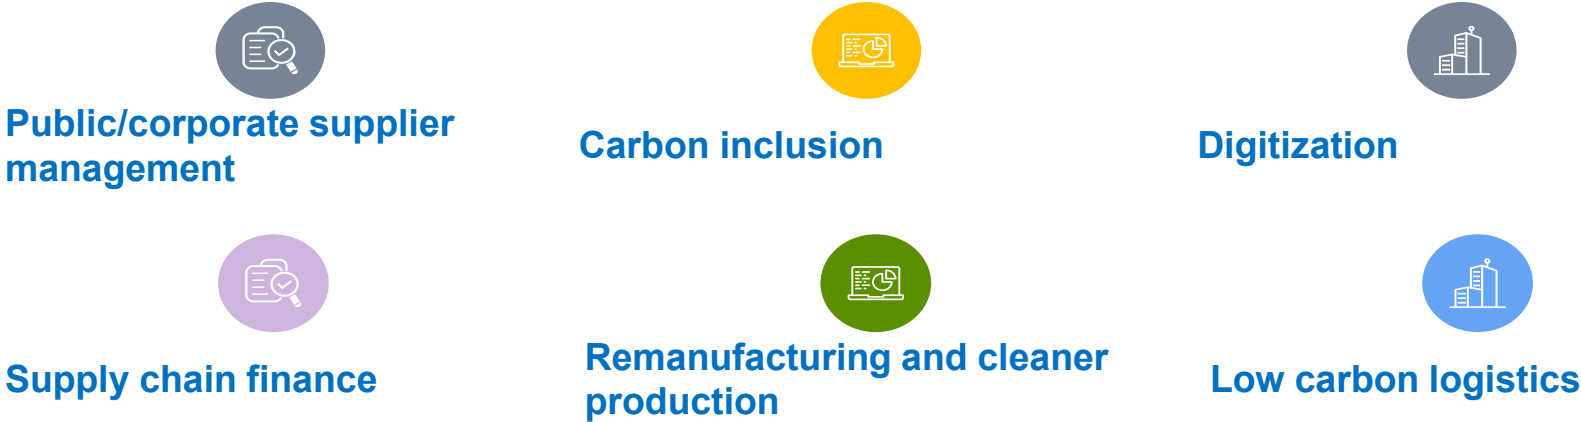

Output and Outcome

SKAO-SPP program	CO2 Performance Ladder a proven and effective GPP best practice
CFIT-SPP program	Requiring life cycle CO2 emissions calculation, reduction, and compensation for carbon efficient and climate neutral IT products
NRF-IGPN Council member	Analysis on greenhouse gas emissions hotspots and reduction levers for retailer products
GIZ-IGPN advisory board member	GPP for Carbon-Label integration
GPN Thailand	Wacoal low carbon solution to sustainability
GPN China	Approach of promoting supply chain carbon reduction through product strategy: practical exploration of "alcohol-hydrogen electric" technology for zhejiang Yuancheng new energy commercial vehicles
GPN China	Synergize enterprise carbon governance to sustainable development goal: Establishment, innovation and practice of Media air-conditions carbon footprint management system
GPN India	Procurement Sustainability - Tracking Scop 3 Emissions, on-going
GPN Japan	on-going
Western Cape-SPP Program	on-going

Output and Outcome

Theme

Content

First, Business to business (B-B) purchasing, optimized purchase decisions and promote upstream and downstream collaborative emission reduction based on carbon label or carbon reduction;

Second, public procurement, required its supplier based on carbon label or carbon reduction, in order to achieve carbon reduction target set by government and institution in response to climate change;

Third, the carbon emission was quantified and transparent based carbon label or carbon reduction through supply chain.

Output and Outcome

Collaborative activity

For new application of Green Purchasing Networks measurement methodology

- Incorporated in the global framework of action, harnessing procurement to drive circularity and climate resilience in the built environment;
- Participate in the 2025 procura+ award of global initiative: there is still distance;
- Article submission to the academic publications: limitation for the implementation, alternative solution needed

Next steps

Commits to the IGPN mission, engage in cooperation and technical models, through the expansion of membership scale, strive to promote the practice of sustainable procurement at the national and regional levels.

Optimize platform

- Focus on details for differentiation;
- Connect and integrate meetings, webinars from members, stakeholders, partners;
- Richen annual meeting arrangement

Core and stable cooperative activities

- Finalize the case collection report, and the joint promotion activities on the 10 cases
- GPN measurement methodology application alternative solution

New members and areas

- New areas development including digitalization, carbon financing;
- Members and stakeholder development in new areas

Follow up

Annual meeting

- the presentations, report to follow up
- Quarter newsletter

Next year arrangement

- Email the next year meeting, activities planned to interacted with members

Joint cases collection

- Each draft reviewed by providing organization first by end of 2025;
- A whole draft cases collection formulated to consult with invited professors to further improvement from January 2026

2025
Annual meeting
